

Across the United States, we are growing a family of engineering and manufacturing businesses whose combined experience creates an industrial powerhouse that is greater than the sum of its parts. Our expertise in operations management, product manufacturing, technical, engineering, and product lifecycle management is changing the way industrial America does business. Close collaboration yields more value for the good of all—our customers, our employees, and the community—for the long term.

Why Re:Build?

Re:Build offers customers a new model of American industrialization. We have a unique combination of manufacturing operations and engineering capabilities that enable customers to grow a local, robust, competitive business. These capabilities will evolve and strengthen through our ongoing deployment of continuous improvement methodologies, the use of proprietary software and digital tools, and intense collaboration within the Re:Build ecosystem. While we frequently provide full product life-cycle management, from concept development to manufacturing implementation, we will also support customers at any discrete point in their journey to productization. As we like to say, “Brain to Box™” or anywhere in between.

INDUSTRIES SERVED:

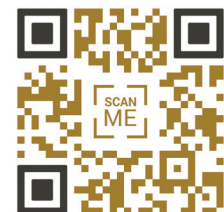

- Aerospace & Defense
- Cleantech
- Health
- Industrial Equipment
- Mobility

LOCATION:

📍 161 Worcester Road
 Suite 606
 Framingham, MA 01701

Core Competencies:

- Industrial, Consumer, & Medical Product Development
- Branding & Product Positioning
- Prototyping
- Software, IoT, AI, & Machine Learning
- Structural Design & Analysis
- Microfluidic, Millifluidic, & Fluidic Design
- Custom Automation & Process Optimization
- Systems Integration
- Embedded Systems
- Electrification & Battery Technology
- Thermoset & Thermoplastic Composites
- Machining
- Precision Metal Fabrication
- Supply Chain Management
- Manufacturing Facility Design & Construction

Re:Build's Footprint:

Customers rely on us for the technical expertise and problem-solving abilities of our nearly 1,000 employees located at sites across the United States.

900,000+ ft²
 of Design, Engineering, and
 Manufacturing Space

HIGHLIGHTED CUSTOMERS:

- 3M
- 6K
- Airbus
- Antora Energy
- Bell
- Bissell
- Boeing
- Boom Supersonic
- Carestream Health
- Collins
- Desktop Metal
- Eastman Kodak
- Elroy Air
- FlaskWorks
- Flexomics
- Form Energy
- Fujifilm Dimatix
- General Electric
- Ginkgo Bioworks
- Icon Aircraft
- Kifarú
- KitchenAid
- Nanopath
- Newell Brands
- Sage Science
- Sight Diagnostics
- Sikorsky
- Stryker
- Ultralife Batteries
- Virgin Galactic
- Whirlpool
- Xwing
